For pricing information: Email: lights@fleet-strobe.com Call: 1-800-791-7715

We sell and service a complete line of safety lighting products. If you don't see an item you are searching for here on our website, please contact us. If you are ordering a quantity of lights or represent a municipality, school or business and wish to set up an account with us, call us at 1-800-791-7715, email us at [www.fleet-strobe.com](mailto:lights@fleet-strobe.com), or click on CONTACT US in the menu to the left.

Warranties vary on products from 1 to 5 years. Lights have a 2 Year warranty, unless specifically noted on product info page. The warranty covers parts (excluding bulbs and cords) and labor from date of manufacture on all lights. Return defective product to us (shipping charges at your cost) for repair or replacement. We will ship repaired or replaced product back to you at no charge. This warranty is void in case of abuse or misuse of product.

We sell and service a complete line of safety lighting products. Whether you need a strobe light, lightbar or revolving light for a snowplow, rural post office vehicle, forklift or your entire fleet, we can supply it. We also stock LEDs, DOT systems, headlight flashers (wig-wags), golights, barricade lights, backup alarms and more. If you don't see an item you are searching for here on our website, please contact us. If you are ordering a quantity of lights or represent a municipality, school or business and wish to set up an account with us, call us at 1-800-791-7715, email us at lights@fleet-strobe.com, or click on CONTACT US in the menu to the left. If you are outside the contiguous 48 states, please contact us. We would be happy to explore the best shipping options to meet your needs

FI-SI-Mini Toggle

This SPST lighted switch (red when on) will handle 20 Amps at 12 VDC.

The operator needs to attach supplied angle switch holder piece to vehicle with supplied bolts.

One hot connection for both the lighted switch and the switch mechanism, ground for the light circuit (3 connections total) for both circuits.

The post closest to the metal bracket is the ground for the lighted switch.
The middle post is for the 12 VDC. The post furthest from the metal bracket is the source
(to control/power the light)

IC-72A
